- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, superior food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM

- Equipped with two, independent, factory engineered, self-contained, capillary tube refrigeration systems using environmentally friendly (CFC free) refrigerant. Refrigerator uses 134A and freezer uses R404A.
- Refrigerator located in left section; freezer in the right.
- Extra large evaporator coils balanced with higher horsepower compressors and large condensers; maintain colder standard temperatures for the best in food preservation. Refrigerator holds 33°F to 38°F (.5°C to 3.3°C); freezers holds -10°F (-23.3°C).
- Sealed, cast iron, self-lubricating evaporator fan motors and larger fan blades give True reach-in's a superior low velocity, high volume airflow design. This unique design insures faster temperature recovery and shorter run times in the busiest of foodservice environments.
- Bottom mounted condensing unit positioned for easy cleaning. Compressor runs in coolest and most grease free area of the kitchen. Allows for storage area on top of unit.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.
